

GEOGRAPHICAL INDICATION IN INDIA: CURRENT SCENARIO AND THEIR PRODUCT DISTRIBUTION

Swati Sharma

Independent Researcher, Gohana, Distt. Sonipat, 131301.

ABSTRACT

Purpose- The main purpose of this paper is to discuss the concept of geographical indication in India. As geographical indication is an emerging trend and helps us to identify particular goods having special quality, reputation or features originating from a geographical territory.

Research methodology- The main objective of the study is to analyze the current scenario and products registered under geographical indication in India during April 2004- March 2019 and discuss state wise, year wise and product wise distribution in India. Secondary data was used for the study and the data was collected from Geographical Indications Registry. Descriptive analysis was used for the purpose of analysis.

Findings- The result of present study indicates that Karnataka has highest number of GI tagged products and maximum number of product was registered in the year 2008-09. Most popular product that is registered is handicraft. 202 handicrafts were registered till the date.

Implications- The theoretical implications of the study is that it provides State wise distribution, year wise distribution and product wise distribution of GI products in India. This helps the customers as well as producers to make a brand name of that product through origin name.

Originality/Value- This paper is one of its kinds which present statistical data of Geographical Indications products in India.

Keywords: Geographical Indications, Products, GI tag and Place origin.

INTRODUCTION

Every geographical region has its own name and goodwill. Geographical Indication is an emerging trend in intellectual property rights. Geographical Indication is a sign that is used on the products which have a specific origin and possess a good quality reputation due to that Geographical location. It is used to identify particular goods having special quality, reputation or

features originating from a geographical territory. Geographical Indication (GI) was first used in international intellectual property laws under TRIPS (trade related aspects of intellectual property rights) of WTO (world trade organization), which came into force in 1995. India engaged in GI Act as a member of WTO and enacted the Geographical Indication of goods (registration and Protection) Act, 1999 which came into force in 15th September 2003. This act extends to whole India. GI tag associated with any agricultural, natural or manufactured goods or any goods of handicraft or of industry and includes food stuff. The fourth schedule of GI defines the classification of goods. This schedule classifies the goods in 34 classes. In 2004, Darjeeling tea becomes the first and popular GI tagged product in India.

Article 22(1) of WTO trade related intellectual property rights agreement defines geographical indication as “..indications which identify a good as originating in the territory of a Member of WTO, or a region or locality in that territory, where a given quality, reputation or other characteristic of the good is essentially attributable to its geographical origin..”

Benefits of GI tag are that it confers the legal protection, boost export and promotes the quality of products. It prevents from the unauthorized use of GI tagged products by others.

REVIEW OF LITERATURE

Bowen and Zapata (2009) examine the case study of Tequila in Mexico. They examine the potential of geographical indication to contribute in ecological and socio-economic sustainability. The geographical indication for tequila was established by Mexican Government in 1947 and it was best recognized outside the Europe also. The researcher shows that constant cycle of surplus and shortage of changing production relations in tequila industry leads to economic insecurity, increase use of chemical production and decline in fertilizer application.

Bagade and Metha (2014) define a conceptual framework of geographical indications in India. The research paper defines the importance of geographical indication protection and functions of geographical indications. This paper also defines the state wise and product wise distribution of geographical indications registered in India. This paper defines the registration procedure of geographical indication in India. The main finding reveals that registration of geographical indications is not compulsory in India. If it is registered in India then it became relatively easy to seek protection in other member countries of World Trade Organization (WTO). The study is also supported by **Gulati (2016)** which provides the concept, historical background and legal framework of geographical indication in India. The researcher analyzes the famous case of India weave Banarasi Brocade in India. Secondary data is used for the analysis. The researcher defines geographical indication tag as a matter of pride to producer and customers as a symbol of

goodwill, quality and originality. Banarasi Brocade and sari is one the important geographical indication in India.

Zhao, Finlay and Kneafsey (2014) define the effectiveness and development of contemporary geographical indications of Chinese agriculture food mainly by government intention to increase the farmer's income in China. The researcher defines the conceptual framework of agrifood quality and took three case studies that are: Ganan navel orange, Nanfeng mandarin and Wuyuan green tea. The findings indicate that the quality of geographical indication products is not being enhanced by geographical indication schemes in above cases.

Venkatesh and Kumarasamy (2015) analyze the problems that arise in handloom industry and protection of handloom industry by using geographical indications as a competitive strategy. The research takes a study of Colombian coffee as a success story of geographical indication in Colombia. The finding of the study is that geographical indication has a competitive advantage in handloom sector in near future.

Manjunatha (2016) define the status of geographical indication in India especially in the state of Karnataka with an objective to explore the current scenario of geographical indications in the state of Karnataka during 2003 to 2015. The results show that 28 states registered their products as geographical indications and 14.47% of total products were from Karnataka state.

Yadav, Chaudhary and Sahani (2018) describe the conceptual framework of geographical indication and the process of registration of products under geographical indication in India especially in the state of Uttar Pradesh. Total 289 GI tags were issued in India, out of which only 24 products was from Uttar Pradesh.

RESEARCH METHODOLOGY

The main objective of this study is

- To analyze the current scenario and products registered under geographical indication in India during April 2004- March 2019.
- To define the year wise, state wise and product wise distribution of different products under geographical indication.

The present study is descriptive in nature primarily based on secondary data. The secondary data is collected from World Trade Organization, the World Intellectual Property organization and Geographical Indications Registry (Intellectual Property India). Descriptive analysis (Charts and Tables) was used for the purpose of analysis.

THE STATUS OF GEOGRAPHICAL INDICATORS IN INDIA

Geographical Indication is a commanding tool to defend the ownership right on products. Products can be categorized into agriculture products, handicraft, Manufacturing goods, Natural goods and Food stuff. The concept of Geographical Indication came into India in 2003 and in 2004, Darjeeling tea become the first GI tagged product of India. This section discusses the classification of GI tagged products of India. This section is divided into three sections-

- Product wise classification
- Year wise classification
- State wise classification

Product wise classification

Products are classified into agricultural products, handicraft, manufacturing products, textile, food stuff and natural goods.

Table 1: Product wise classification of GI tagged Products in India

| Product category | No of Goods | Percentage |
|-------------------------|--------------------|-------------------|
| Agricultural Products | 103 | 30.03 |
| Handicraft | 202 | 58.89 |
| Manufactured goods | 22 | 6.41 |
| Natural goods | 02 | 0.58 |
| Food stuff | 14 | 4.08 |
| Textile | 0 | 0.00 |
| Total | 343 | 100.00 |

Source: data compiled from Registration detail of GI report (GI Registry Office)

Table 1 classifies the GI tagged products of India into 6 categories. Products are classified into agricultural products, handicraft, manufacturing products, textile, food stuff and natural goods. The above tables define that total number of agricultural products was 103 out of 343 that is 30% of total products. Handicrafts were the highest percentage that is 58.89% of total products. Natural goods were 0.58% of total products and food stuff includes only 14 products. There was no GI tagged textile product registered in India. Handicrafts are very popular in India and then agriculture is also popular in India because agriculture is the primary activity of India.

Manufacturing goods was also need to be improved because they are only 6.41% of total GI tagged products in India. Annexure 1 also describes the name of that GI tagged products in India.

Year wise classification

The concept of GI product came in India in 2003. After that GI products registered in India. Following is the year wise classification of GI tagged products in India from April 2004-March 2019.

Table 2: Year wise classification of GI tagged Products in India

| Year | Agriculture | Handicraft | Manufacture | Food stuff | Textile | Natural goods | Total |
|-------------|--------------------|-------------------|--------------------|-------------------|----------------|----------------------|--------------|
| 2004-05 | 1 | 2 | - | - | - | - | 3 |
| 2005-06 | 2 | 18 | 4 | - | - | - | 24 |
| 2006-07 | 2 | 1 | - | - | - | - | 3 |
| 2007-08 | 11 | 19 | 1 | - | - | - | 31 |
| 2008-09 | 10 | 33 | 1 | 1 | - | - | 45 |
| 2009-10 | 5 | 7 | 1 | 1 | - | - | 14 |
| 2010-11 | 7 | 15 | 4 | 3 | - | - | 29 |
| 2011-12 | 4 | 15 | 4 | - | - | - | 23 |
| 2012-13 | 2 | 18 | 1 | - | - | - | 21 |
| 2013-14 | 4 | 17 | 1 | - | - | - | 22 |
| 2014-15 | 11 | 5 | 1 | 2 | - | 1 | 20 |
| 2015-16 | 9 | 17 | - | - | - | - | 26 |
| 2016-17 | 14 | 13 | 2 | 4 | - | - | 33 |
| 2017-18 | 7 | 18 | - | 1 | - | - | 26 |
| 2018-19 | 14 | 4 | 2 | 2 | - | 1 | 23 |

Source: data compiled from Registration detail of GI report (GI Registry Office)

Table 2 classifies the products into year wise category. In starting year only 3 products were registered out of them 1 was agricultural product and other 2 were handicraft products. In 2005-06, 24 products were registered out of them 18 were handicraft products. Highest number of products was registered in the year 2008-09. In the year 2008-09, highest number of handicraft

products was registered that are 33 products. Highest number of agricultural products was registered in the year 2016-17 that was 14 products. Natural goods were registered in the year 2014-15 and 2018-19. Only 2 natural goods were registered. Highest number that was, 4 food stuff was registered in the year 2016-17. In year 2010-11 and 2011-12, 8 manufactured goods were registered that are 4 from 2010-11 and 4 from 2011-12.

State wise classification

As GI tagged products are known for their origin. So there is a brief description of state wise classification of GI tagged products in India. In India there are 29 states and 7 union territories. Some of GI products are also from 2 or more states. Details of State wise classification of GI tagged products are enclosed in annexure I. Annexure I define all products that are registered under GI tagged products in different states.

Table 3: State wise classification of GI tagged Products in India

| No | State | No of GI | No. | State | No. of GI |
|----|------------------|----------|-----|---|-----------|
| 1 | Andhra Pradesh | 19 | 18 | Odisha | 15 |
| 2 | Arunachal | 1 | 19 | Pondicherry | 2 |
| 3 | Assam | 7 | 20 | Rajasthan | 14 |
| 4 | Bihar | 13 | 21 | Sikkim | 1 |
| 5 | Chhattisgarh | 6 | 22 | Tamil Nadu | 30 |
| 6 | Goa | 1 | 23 | Telangana | 14 |
| 7 | Gujarat | 15 | 24 | Tripura | 1 |
| 8 | Himachal Pradesh | 8 | 25 | Uttar Pradesh | 26 |
| 9 | Jammu & Kashmir | 7 | 26 | Uttarakhand | 1 |
| 10 | Karnataka | 40 | 27 | West Bengal | 21 |
| 11 | Kerala | 28 | 28 | Kerala, Karnataka & Tamil Nadu | 1 |
| 12 | Maharashtra | 30 | 29 | Punjab, Haryana & Rajasthan | 1 |
| 13 | Manipur | 4 | 30 | Maharashtra, Gujrat, Haveli & Daman Diu | 1 |
| 14 | Madhya Pradesh | 10 | 31 | MP & Maharashtra | 1 |
| 15 | Meghalaya | 2 | 32 | Punjab, Haryana, HP, UP & Delhi | 1 |
| 16 | Mizoram | 1 | 33 | Karnataka & Maharashtra | 1 |

| No | State | No of GI | No. | State | No. of GI |
|---------------------------|----------|----------|-----|--------------------|-----------|
| 17 | Nagaland | 3 | 34 | Karnataka & Kerala | 2 |
| Total= 328+ 15 foreign GI | | | | | |

Source: data compiled from Registration detail of GI report (GI Registry Office)

Table 3 defines the GI tagged products that are registered in different states. Some of them were jointly registered by two or more states. In the above table highest number of products was registered in Karnataka that was 40 products were registered in that state. 30 products were registered in Maharashtra and Tamil Nadu respectively. Arunachal Pradesh, Goa, Mizoram, Sikkim, Tripura, Uttarakhand have only 1 product that was registered under GI tagged products. Kerala and Karnataka jointly registered 2 products. Punjab, Haryana, HP, UP & Delhi jointly registered 1 product that was basmati rice.

CONCLUSION

India is one of the fastest growing countries in the world. India made their contribution in growing upcoming intellectual property that is Geographical Indication. Total number of Geographical Indications is increasing year by year. The concept of GI made the manufacturers, farmers, craftsmen, etc. very responsive. It leads to increases the profits of these persons and helps to identify the particular goods or services. This study made an attempt to discuss various GI tagged products and their growth in India. The study was descriptive in nature and secondary data was used for the analysis. The findings of this study were Karnataka has highest number of GI tagged products and maximum number of product was registered in the year 2008-09. Most popular product that is registered is handicraft. 202 handicrafts were registered till the date.
